“Education is the most
powerful weapon,
Which you can use to
change the world.”

"A Mission :

To see India as super power by 2020'

Our mission is to bring up and develop the village talent by introducing world class education in an innovative learning environment.

The Father of Nation Mahatma Gandhiji said, "If you want to see India, see its villages first".

When I was a student, I had to walk 100 kms down the village to the city to seek higher education. The time spent in traveling could have been utilized in other curricular activities. More over for a female child, managing higher education was almost impossible. Then I realized that in spite of having intelligence, talent and potential to be successful, the talent cannot be nurtured properly and it becomes very difficult for us to turn our dreams into reality due to lack of resources.

Keeping in view the aforesaid, this institution is established with the aim of bringing resources at the door-step of village talent. The Institute endeavors to provide excellent educational facilities to groom the village youth, creating value driven human beings and successful professionals who are committed and dedicated to their work.
